The Municipal Board of Shikarpur proposes the execution of water supply scheme

of ~~sanitary~~ drainage works estimated at Rs 15000 as sanitary measures for the eradication of Plague and other epidemic diseases impending the town owing to its proximity to villages in the Dharwar District. The municipal funds are insufficient to meet the cost, a loan of half the amount and a grant in aid of the remainder is prayed for. Under the provisions of ~~the~~ the Municipal Act this may be sanctioned subject to the rules in force.

BR. 23/9

No. 264 — 1/217

Deputy Commissioner's office
Shimoga district
Shimoga 19th September 1898.

To

The Secretary to the Government
of Mysore
General and Revenue Depts.

Sir,

I have the honour to submit the following proposals with regard to the improvement of the town of Shikarpur.

2. The town is composed of a number of blocks of houses separated by vacant patches of considerable extent, so that the length of the streets within the municipal limits is quite out of proportion to the number of inhabited houses therein. The ground is all quite flat and very difficult to drain properly. There are a number of large pits in the town, where water stagnates during the rains and renders the place very unhealthy. The rank vegetation which in this semi-malnad place is rather luxuriant

unoccupied area, and in the many decayed house sites adds to the unhealthiness of the town

3. To drain this town effectually by means of stone drains and other devices, would cost a large sum of money. Though the population of the place is over 5000, most of the houses are poor thatched huts, and I do not think that a place like this deserves an expensive scheme of improvement. All that we may fairly do for it seems to be that the pits should all be drained wherever practicable and filled up where they cannot be effectually drained. A sum of about 5000 Rs would be required for this purpose.

4. As for the vacant sites, I shall introduce the new Sanitary Rules at the earliest opportunity and try to improve them in cleanliness as much as possible. If the vacant sites not owned by private owners or resumed from their occupation are enclosed and used for grass, they will be kept clean, and may possibly afford

return.

5. There is considerable difficulty for water supply. For want of a better scheme, I was for sinking 7 or 8 wells in convenient localities and improving one or two ponds But the Executive Engineer who was at the place when I visited has hit on a scheme which I think is a better one. It is briefly to lead the water of a tank about 6 furlongs from the town called Kolikere, supplementing it with two minor Kattes called Karavana-hondas and Ramblihonda to be improved for this purpose. The levels are very convenient and the proposal is to take the water in an open channel (fenced securely) and distributing it by 6 or 8 masonry wells (Karanjis). It is said that this scheme need not cost more than 10000 Rs -

6. There is no surplus at the credit of the municipality sufficient to meet these items - I would respectfully request the Government to advance the sum,

being a grant from Provincial Funds and half a loan to be repaid at the rate of 500Rs a year. I would also beg that no interest may be charged or if that is not permissible that the lowest possible rate may be accepted. If the sum is sanctioned, the schemes will be worked out in detail and submitted to Government. If the Government is pleased to sanction this loan this year, good progress may be made and some other town may be taken up for special treatment next year. If no grant from Provincial Funds can be granted, it would be a boon to the town even if the whole sum is advanced as a loan without interest. A copy of the Municipal Board's resolution on the subject is herewith submitted.

I have the honour to be,

The Chief Engineer of Mysore

To

The Secretary to Government of Mysore

General and Revenue Departments

Sir,

With reference to Govt:Pro:No:6386-7/L.F.29-98 dated 19th November 1898, regarding the Drainage and Water Supply Scheme of the Shikarpur town, Shimoga District, I have the honour to forward the enclosed copy of docket No.1742/370 of the 20th instant, from the Sanitary Superintending Engineer and to inform you that under the circumstances reported by that officer, he has been apprised that the preparation and consideration of the project referred to above may be deferred until the Municipality can see its way to provide the required funds, as, in the present state of the finances Government is unable to grant a loan, or carry out the work at its own cost.

I have the honour to be,

Sir,

Your most obedient servant,

W. D. W. Hutchins

B.S.T. Offg Chief Engineer of Mysore.

Chief Engineer's No.476 of 23-11-98, forwarding a copy of Government Pros:No.6386-7/L.F.[illegible]-98 of 19-11-98, regarding the Drainage and water supply Scheme of Shikarpur town, Shimoga District for preparing a project.

000 00-----

In returning the original enclosures received with the above [illegible] to report [illegible] Sundaram Iyer, Assistant Engineer, was deputed to inspect and submit a preliminary report on the proposals. II. On receipt of the said report extract therefrom were forwarded to the President for information and [illegible] Pro: No.910-L.F.[illegible]-98 of 21st July 1901.

III. The President in [illegible]

Spoken by [illegible]
20/7

6-5-1901, stated that the Municipality is unable to b
the cost viz Rs.25,000/- and that if the Government is pl
contribute a moiety of the cost, the Board will raise a loan fo
other half.

IV. A reminder was sent on 3-7-1901, enquiring as to the orders passed on the resolution of the Board noted in para III, in reply the President states that as Government are not likely to sanction any loan in the present condition of the finance, the matter has been allowed to lie over for the present.

V. Under the circumstances orders are solicited as to whether the project may be allowed to lie over.
